

Project Description for "Rolodex"

Developer Information:

- **Developer Name:** Rajkumar Shaw
- **Email:** rajkumarshaw624@gmail.com
- **Phone Number:** +91 970-8493-575
- **Qualification:** M.Tech (CSE)
- **Language Used:** HTML, CSS, JavaScript
- **Author:** Ali Van & Miranda

Project Overview: This project involves the development of a creative and interactive entrance for the Rolodex. The project utilizes HTML, CSS, and JavaScript to create a visual effect where the word "rolodex" is displayed with a unique animation. The 'o's in "rolodex" are represented as solid circles (dots), and as the animation progresses, the surrounding letters fade away, leaving only the dots. The dots then merge into one, which upon clicking, transforms into a constellation of 28 dots.

Technologies Used:

- **HTML:** For structuring the content and defining the webpage layout.
- **CSS:** For styling the webpage and creating responsive, aesthetically pleasing designs.
- **JavaScript:** For implementing the animation logic and interactive elements.

Features:

- **Responsive Design:** The project is optimized for different screen sizes to ensure a consistent experience across devices.
- **Interactive Animation:** Users can interact with the animation, which includes the transformation of letters and the movement of dots.
- **Dynamic Dot Movement:** The 28 dots, representing a constellation, move randomly and can be stopped and resumed on hover.

Meta Information:

- **Canonical URL:** <https://www.rolodex.cc>

Project Description in Meta Tags: Explore Rolodex, an online journal and collective space dedicated to the pursuit of living through art. Featuring works by Ali Van, Miranda Zhen-Yao Van-Boswell, and the a.f.t. cooperative, Rolodex offers an archival space and publishing platform for intersubjective and interwoven experiences. Join our community in New York, the Scottish Highlands, Hong Kong, and Minnesota.
